Attention: Dick Barbar

Dear Mr. Hastey;

The enclosed documents are provided in support of proposed NWC Unified Land Withdrawal legislation submitted concurrently in March 1984 by the California State Director and the Naval Weapons Center via Western Division Naval Facilities Engineering Command to higher authorities in Washington for review and consideration.

Complete documentation (see Table 1) will be available 29 June 1984. The enclosed advance material is forwarded to expedite the review process in support of the goal of introducing the Unified Legislation into the current session of the Congress. Final and official submission of complete documentation will be made via Western Division Naval Facilities Engineering Command.

Since there is no change in land use, the Desert District Manager has agreed that a categorical exclusion in lieu of an Environmental Assessment will satisfy the requirements of the National Environmental Policy Act for review of existing NWC land withdrawals. The BLM Ridgecrest Resource Area Manager issued a categorical exclusion on 23 May 1984 (see Table 1).

The Naval Weapons Center sincerely appreciates the cooperation and support of the California BLM in preparation of the proposed Unified Bill and its supporting documentation.

PROPOSED ACTION AND ALTERNATIVES

In accordance with the Federal Land Policy and Management Act (FLPMA), the Naval Weapons Center (NAVWPNCEN) ranges withdrawn under public land orders (PLOs) are in the process of review. The lands involved, China Lake, Randsburg Wash, and the Interrange Access Road, are described on the title page of this report. The proposed action is for the continued withdrawal and exclusive use of the China Lake, Randsburg Wash Ranges, and Interrange Access Road for a 50-year period from the date of Congressional approval. This will be an administrative action under the Engel Act (1958) and FLPMA. Operations and land users will continue as they presently exist under the jurisdiction of the Navy. No new users will be authorized by this action. The approval of the withdrawal will allow the Navy to plan for expansion of operations and facilities, but not without subsequent site-specific environmental approvals. The withdrawal will include the approximately 604,849 acres of the China Lake Range, the 172,681 acres of the Randsburg Wash Range, and the approximately 3,450 acres of the Interrange Access Road.

Alternatives to the proposed action that have been evaluated are: 1) relocation to another military activity; 2) establishment of comparable new ranges elsewhere; 3) reduce the size of the existing ranges; 4) right-of-way in lieu of withdrawal; and 5) continuation of the existing withdrawals without review (the "no action" alternative).

Alternatives 1 and 3 are not feasible alternatives because of space limitations, scheduling conflicts, cost of either relocating or establishing new complex instrumentation, and costs in range downtime, manhours and reduced aircraft operations.

Alternative 4 would not permit the Navy to maintain the necessary exclusive use of the ranges. Exclusive control is essential for addressing the unusual field needs of the Research, Development, and Test and Evaluation (RDT&E) communities. Extensive range activities, the use of live ordnance, and the highest levels of security classification associated with electromagnetic and other warfare systems, necessitate general closure to non-military land use.

Alternative 5 would not meet the legislative mandate of withdrawal review set forth in FLPMA.

RECOMMENDATION

It is recommended that the existing withdrawals for the China Lake, Randsburg Wash Ranges, and Interrange Access Road be continued as requested. It is believed that continuation of these three withdrawals best serves the national interest in protecting a unique and critical RDT&E capability.

RELATIONSHIP OF THE PROPOSED ACTION TO LAND USE PLANS

Land use plans for local, state and federal agencies in the area would recognize the existence of these three withdrawals and would not have to be mod- ified if the withdrawals were continued.

ENVIRONMENTAL DOCUMENTATION

Since the use of the China Lake, Randsburg Wash Ranges, and Interrange Access Road is an existing and on-going activity, the continuation of the withdrawals is a categorical exclusion. No environmental documentation is required (516 DM, Appendix 5.4(B)(28)).
